[369073153/](#)

Since 2016, I have been working as Software Engineer, I have been repeatedly recognized for developing innovative solutions for globally deployed software. I am responsible for full life-cycle development of next-generation software, from initial requirement gathering to design, coding, testing, documentation and implementation. My technical expertise includes platform proficiency (Windows); fluency in scripting/programming languages (.NET CORE,MVC, Angular, JavaScript, jQuery, Web Services; SQL & MySQL; Docker, Jira, Jenkins;Github;Gitlab, HTML and Azure Cloud); and advanced knowledge of developer applications, tools, methodologies and best practices (client/server architecture and self-test automation). My experience in developing user-friendly solutions on time and on budget would enable me to step into a Software Developer role and hit the ground running.
